Syngilar Phenomenon—Dring up of a Lake in Miniman.—A correspondent of the Colewater (Michigan.) Gantle gives some particulars connected with the recent disappearance of the water from Ottawa Lake: ance of the water from Ottawa Lake:

For some days past Ottawa Lake, in Monroe county, has presented a very exciting
scene. The occusion was this. Those living
near the lake observed for some days previous
that the ice on the lake was falling. Soon
they discovered that the fish were crowding
to the holes in the ice where they watered
their cattle. They increased in numbers,
both large and soull, the former having their
mouths wide open, and so exhansted that the
people caught them with their hands. As
many teams daily visited the lake, hauling
stones from its shores, for building purposes,
the news soon spread to a distance all around.
The work of quarrying and hauling stones the news soon spread to a distance all around. The work of quarrying and hauling stones was soon abandoned, and in a short time scores of teams and hundreds of men might be seen on and around the take. The men with handspikes, crowbars and axes, were busily engaged in cutting and raising huge pieces of ice, and then stooping down and lifting the fish, some of which were dead, some alive, and some frozen fast in the ice, for the water having depurted from the lake by some subternaneous passage, the vast sheet of ice lay on the bottom. For three days immense quantities of fish were carried away, principally pickeral and bass, while days intractice quantities of his were carried away, principally pickeral and boss, while vast quantities of white fish were left to rot on the lee and in the mind—for mad and tox are all that is left of Ottawa Lake. Numerous pieces of the lee are left standing on edge, like so many grave stones. The lake, rather the bed, or graveyard, presents a novel scene. Some say the water will soon return by the same source or which it decorted between
